

## Job description

**Job Title: Web designer**

### Reporting to:

Mark Ganellin, Managing Director

### Location:

Marketing Zone, Buntingford, Hertfordshire, occasionally attending meetings at client premises

### Responsibilities:

Frontend and backend web designer needed for small communications agency to create and maintain client websites

### Primarily:

- You will have expertise in HTML / XHTML & CSS. Software of choice will be CMS, Dreamweaver and Adobe Photoshop.
- Have knowledge of PHP based CMS (i.e. Joomla, Wordpress).
- A familiarity with W3C HTML & CSS standards and general accessibility issues
- Testing tools, such as W3C code validators, Firefox Web Developer extension, or similar.
- Knowledge of PHP, ASP and MySQL

We need you to be motivated, energetic, able to contribute with ideas supported with implementation know-how. You'll be working closely with the rest of the design team who are experienced graphic designers and web designers who have excellent design and interface skills but basic Front End coding. This is a new role created to improve and expand our in-house site building capability.

**Hours:** 9am – 5.30pm weekdays
